Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

Claim 1 recites the limitation "the folded points". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Pat. No. 5,788,332 to Hettinga in view of U.S. Pat. No. 5,683,811 to Hernandez et al.

Hettinga discloses

1. An elastic cushion comprising:

a cover 22 having a cavity inside; and

an elastic body received inside the cover having

a top surface and rear surface 18;

an inner portion 16; and

multiple elastic tubes folded together, wherein the elastic tubes are melted at folded points (col. 3-4 lines 64-67 & 1-2). Hettinga fails to disclose the tubes having a hollow center. Hernandez discloses an elastic fiber for a cushion having a hollow center (col. 1 lines 30-34). It would have been obvious to one having ordinary skill in the art at the time of the invention to employ an elastic fiber as taught by Hernandez with the cushion of Hettinga in order to alter the crimp and improve the durability of the filler.

Art Unit: 3673

Claim 2, wherein the top surface and the rear surface of the elastic body are formed by a density of the folded elastic tubes, and the inner portion of the elastic body is formed by a density of the folded elastic tubes, wherein the density of the folded elastic of the top surface and the rear surface is larger than that of the inner portion (col. 3 lines 42-50)(Hettinga).

Claim 3, wherein the top surface of the elastic body is formed as an arcuate top surface (fig. 2)(Hettinga).

Claim 4, wherein the top surface of the elastic body is formed as an arcuate top surface (fig. 2).

Claim 5, wherein the elastic tubes are plastic tubes.
